

❖ Electrical Evaporator with Vacuum System (EEVS)

- An Electrical Evaporator with a vacuum system is designed to evaporate water from Effluent using submerged electric heaters, where water vapor is condensed and reuses to archive Zero Liquid Discharge (ZLD) application as per Govt. Norms for industries who do not have access to utilities such as steam or thermic oil.
- Electrical Evaporators with vacuum system provide a sustainable solution for wastewater management, helping industries to achieve their environmental targets and comply with regulatory standards.

❖ Key Features:

- Lowest in Capex
- Portable system/pre-assembled
- Compact Design
- Lowest Foot Print
- No Site cost (Except Utilities)
- Plug & Play
- Only Electricity Required

❖ Targeted Industries:

- Mechanical Industry
- Electroplating
- Automobile
- Pharmaceuticals
- Chemical Industry
- Textile Industry
- Food and Beverages
