

## ❖ Electrical Evaporator (EE)

- An Electrical Evaporator utilizes electrical energy to evaporate effluent water in the atmosphere by using submerged electric heaters. It is an effective method to achieve zero liquid discharge applications for small-scale industries who do not have access to utilities such as steam or thermic oil.
- The Electrical Evaporator is specially designed for clients who prefer to run their plants with electrical energy only, ensuring an efficient and cost-effective solution for wastewater treatment.

## ❖ Key Features:

- Lowest in Capex
- Portable system/pre-assembled
- Compact Design
- Lowest Foot Print
- No Site cost (Except Utilities)
- Plug & Play
- Only Electricity Required

## ❖ Targeted Industries:

- Mechanical Industry
- Electroplating
- Automobile
- Pharmaceuticals
- Chemical Industry
- Textile Industry
- Food and Beverages
